

SKODA

The new
Scala

For all that you are

You are what you do. And if you play a lot of roles in life, then you need a playmate who can keep up with your pace. Someone like the new Škoda Scala.

The Scala's do-it-all attitude is dressed in a strikingly unique design. Inside, the Škoda Scala continues to tick all possible boxes with its host of comfort, connectivity and safety features. The modern driver will certainly feel empowered by must-haves like the LED headlights, Climatronic panel, Virtual Pedal and immersive infotainment display.

That's what we call versatile. That's what we call Škoda.

Add beauty to duty

We believe that your companion for everyday mobility should bring you joy and excitement with its attractive looks. The Scala is an example of that. The compact hatchback combines the sporty style and empowering functionality that builds on the long heritage of Škoda family cars.

Active meets attractive

At the first glance, you'll notice the sleeker headlights. The wider front grille and distinctively sporty-shaped bumper complete the new, more dynamic look of the Scala. The sportier rear bumper sets off the whole style. Still as practical as ever, but now even more attractive.

Panoramic roof

On the outside, the panoramic roof underscores the sleek, stylish look. On the inside, it brightens the interior and opens the view of the sky above.

The sleeker, sharper taillights are the prominent feature of the new Scala's rear. The rear bumper with integrated diffuser and eye-catching reflectors adds a sporty touch. The elongated rear window with spoiler and Škoda lettering remains as classy as ever.

M 0466

For day shifts and night shifts

Matrix headlights

They catch the eye and help you see. The three-dimensional design with crystal structure is one of the most prominent visual features of the car, while the advanced TOP LED Matrix technology improves visibility for the driver.

Dynamic rear lights

Helping you be seen with the bright LED light and immersive design. The crystalline elements dynamic turn signal function of the TOP LED rear lights will attract the attention of everyone behind you.

Virtual Pedal

Full hands are not a problem any more. With Virtual Pedal, just a swing of the foot under the bumper is enough to open the door. Available in combination with KESY and electric 5th door.

KESY

No more hassle looking for your keys. With the Keyless Entry, Start, and Exit System, the doors unlock or lock again with just a touch of the door handle. You just need to have the key in your pocket.

Door edge protection

Protect your cars and others in the car park. Door edge protection prevents door dings with a simple, reliable mechanical device.

SCALA

Living room. Lounge. Office

Driver focused and sharp, yet functional and roomy for all passengers. The focal point of the new interior is the 10" virtual cockpit, accompanied by 9" Škoda Navigation in the middle of the dashboard. The dashboard itself draws attention with a choice of new upholstered décors made of fabric, Suedia or Carbon look. These are matched by the redesigned seat upholstery for all trim levels. The new ambient lighting with two switchable colours underscores the stylish look.

Climatronic

Maintaining a pleasant climate on board is now easier than ever. The Climatronic air conditioning system is fitted with a pair of buttons that allow you to adjust the air flow without taking your eyes off the road.

Home to all your digital avatars

Today's world is digital. The Scala is the perfect everyday companion to take care of your digital needs as well. Whether charging your devices or providing you with the latest information on a big screen, it always has a solution.

Always charged

With a pair of USB-C ports as standard and optionally available wireless charging, you can keep your devices charged at all times with ease.

Connectivity

You can display your apps on the Infotainment display using Apple CarPlay and Android Auto either wirelessly or via the USB-C ports, which also offer fast 45 W charging for your devices.

Škoda Connect: Take the online world with you

Stay connected wherever you are. Being fully and permanently online means always having access to entertainment, information, and possible assistance while on the move. Škoda Connect is your gateway to a world of unlimited communication options.

MyŠKODA Essentials

Enjoy full control of your car. Download MyŠKODA Essentials and access all necessary services anytime, whether it's driving data, fuel range, lock and unlock or even where you last parked

Online Traffic Information

With Online Traffic Information, you always get up-to-date information, saving you time and the stress of sitting in traffic jams. If enabled, the navigation system will automatically recalculate the route to arrive at the destination just in time.

Additional connectivity options

Discover additional options and features. For example, with Laura, a digital voice assistant is available in your car. With the SmartLink feature, supporting Apple CarPlay and Android Auto, the car's infotainment system allows you to use your phone safely while driving. You can also enhance the in-car connectivity with additional infotainment apps such as Weather, News, Digital Manual, Traffication, and many more.

Traffication

The Traffication app increases your safety by providing traffic-related warnings from the vicinity of the vehicle. Running in the background, it alerts you if you are attempting to drive the wrong way down a road. Notifications are also shown in the event that hazard lights are activated in the radius of your vehicle.

Laura digital voice assistant

This online-based voice control system understands fluent sentences. Say the destination with natural voice input, dictate text messages, or even ask her to tell you a joke. The online part of Laura is ready for anything. To start fulfilling your wishes, simply contact her by saying "Okay, Laura! "

Box for rear passengers

Rear passengers will enjoy the smart storage box on the centre tunnel. It includes a flexible cupholder, which can be folded away when not used to make more room for anything they might want on hand.

Always more than meets the eye

When exploring the world, it's good to have a partner who takes care of all the small things. With its many smart solutions, the Škoda Scala does just that. Everything you might need is easily on hand in the spacious cabin full of storage options.

Double pocket

Keep your things organised with the double pockets on the rear sides of the front seats. The larger one is perfect for a notebook or laptop computer, while the smaller one nicely fits a smartphone.

Net programme

Everything in its place and easy to see. This set of three nets keeps your items from moving around while keeping them in good view.

If it matters, it fits

Net pocket

Lighter items that need to be on hand even when the boot is full can be stored in the practical net, out of sight under the luggage room cover.

Wherever you're going, it's great to have space for everything you might need. It's even better to have everything well-organised and secured safely. With 467 litres of luggage space and a plethora of smart details, everything will find its place and stay exactly where you want it to be.

Cargo elements

The easy way to secure larger items. Cargo elements are fixed to the floor using Velcro and can be folded into any angle.

Predictive Adaptive Cruise Control

Using a radar device, camera equipped with traffic sign recognition, GPS technology and detailed information from the road map, PACC can predict driving conditions for the next 1–2 km. As a result, the system can automatically adjust the cruise speed when necessary – typically before a turn or roundabout, or when entering an area with a reduced speed limit. The system increases driver comfort and driver safety while also reducing fuel consumption and CO₂ emissions.

Even safety can multitask

Adaptive Lane Assist

The system is capable of keeping the car in the middle of the correct lane and of alerting the driver in case of deviation. It can also take control of the car in the event of lane changes during roadworks.

The Travel Assist system combines Adaptive Cruise Control (including Front Assist) and Adaptive Lane Assist functions. For maximum safety, the system must be constantly monitored by the driver. That's why a capacitive steering wheel detects the driver's tactility, providing an interactive interface to the system. If the driver is not engaged in driving, the system issues a visual and audible warning and eventually disengages.

Side Assist

Using radar sensors in the rear bumper, Side Assist (which can detect other vehicles and harder to see objects like cyclists up to 70 m away) monitors the areas behind and beside your car. Based on the distance and speed of the surrounding vehicles, it decides whether or not it should warn the driver.

Matrix LED headlights

The TOP LED Matrix headlights feature Matrix Beam Function. This allows you to use the high beams continuously, without blinding other drivers. Using a windscreen camera, the Matrix Beam Function responds to the traffic situation and turns off only some segments of the light. Other segments are turned on and illuminate the road. The Matrix Beam Function also uses information from the navigation system. Thanks to it, the high beams will only turn on when you are out of a built-up area.

Eyes up front. And behind

Rear Traffic Alert

Using the Side Assist sensors in the rear bumper, Rear Traffic Alert helps you reverse safely from a parking space during poor visibility. It can even engage the brakes automatically if it detects imminent danger.

You can encounter various things on the road. To ensure that the car is ready to handle all situations that may occur en route, additional assistants with multiple functions are on hand to help or fill in for the driver.

Park Assist

Minimise the hassle of parking in tight spots with Park Assist. It automatically selects an appropriate parking place and safely parks in a row of parallel or perpendicularly parked vehicles.

Monte Carlo

Add character to all your characters

Inspired by the great racing heritage of Škoda. Designed to look great both on the roads above Monte Carlo and in the elegant city itself. The Scala Monte Carlo brings sporty style into everyday driving.

Winning looks

Unmistakably sporty, undeniably stylish. The aerodynamic front bumper with integrated spoiler adds dynamic flair, while the gloss black details perfectly suit whatever body colour you choose. The TOP LED Matrix headlights are part of the standard equipment.

The prominent rear bumper with gloss-black diffuser is no not only attractive to look at, but also aerodynamically efficient. Other highlights that are sure to be noticed by the drivers behind you are the elongated glazing and the gloss black lettering.

The trendiest address in any town

Monte Carlo is not only synonymous with the excitement of the famous rally, but also living in style and comfort. The Scala Monte Carlo embodies the same. Scala Monte Carlo is the same. The Carbon look dashboard pad and door inserts combine the elegance with the sporty, dynamic look, which is further enhanced by the characteristic red accents on the upholstery, multifunction sports steering wheel in perforated leather, sports pedal covers and black headliner. The comprehensive equipment, including the Climatronic climate control, 8-speaker stereo, and switchable ambient lighting is there for comfort. The Drive Mode Select allows the driver to choose between the dynamic or cossetting side of the Scala's character.

Racing genes in every corner

The Monte Carlo creates a sportier ambience without compromising on comfort or practicality. It comes with sports seats, sports steering wheel, Carbon look dash pad and door inserts and two-colour ambient lighting.

Focused on the driver

The multifunctional sports steering wheel is upholstered with perforated leather for even better grip and Monte Carlo badge for added style. The standard 8" Digital Display can be switched to sports mode.

Sports seats

The Monte Carlo seats will catch your attention with their sporty red and grey accents. They provide great lateral support for dynamic driving, and plenty of comfort for your everyday commute.

Studio interior

Grey metallic pad with glossy black décor
Black/grey fabric upholstery

Essence

The standard equipment of the Essence version includes 8" Škoda Infotainment, 8" Digital Display, manual air conditioning, Bluetooth, rear sensors, LED headlights, and more.

Studio
