

SKODA

Fabia

Make your choice your voice

Fab town. Urban legend. City slicker. This car may have many names. But there is nothing that defines the Škoda Fabia more than the person driving it. Fresh, distinctive, and eager to impress, this car is equally at home next to the sidewalk or catwalk. Numerous details shape the car's raring-to-go attitude while the bold wheels have the crowds staring at its feet. Not to mention a perkier engine, sharp LED lights, high-level safety systems, a host of connectivity features, and enough room to pack all the compliments.

Being comfortable while being yourself has never been easier. The Fabia isn't just the do-it-all city car. It's a classic original that's been remixed to urban perfection.

CZ 3SZ 8426

Exterior Design

Small car. Big drive.

The dynamic beauty of the Fabia invites you for the drive of your life. The compact dimensions make it a perfect companion for everyday living. The classic elegance merges with the hatchback practicality. A car for every day and every mood.

Dynamic functionality

At the first glance, the dynamic looks are what intrigues you. The sharp tornado line from the chiselled headlights to the dynamic taillights. The choice of intricately designed wheels in sizes up to 17". The chrome and gloss black detailing. Then, you'll appreciate the way Fabia fits more space than ever before onto a still compact footprint, making it both comfortable on long trips and easy to scoot around town.

CZ 3SZ 8426

The look of confidence

With wider grille and sleek, sharp headlights, the Fabia emphasizes its wider, lower, more dynamic stance. A big car in a compact package. Whether you choose the elegant bright trim or the sporty look of gloss black, the Fabia will stand out anywhere – and fit into the finest company. It is nimble but helps you think and live big.

Panoramic roof

The dynamic exterior design can be enhanced by the optional panoramic glass roof, which stretches all the way from the windscreen to the roof spoiler.

Stylish from roof to bumper

The extended roof spoiler and vertical finlets that border the rear window complete the dynamic look of the car. The Škoda lettering across the back exudes modern elegance. The black bumper insert gives the rear a lighter, more sporty appearance.

CZ 3SZ 8426

Headlights and fog lights

The headlights with crystalline decorative elements feature LED in all their versions. The basic LED headlights offer LED daytime running lights, LED dipped beam and full beam, and LED turn indicators. Also available are TOP LED headlights with LED side lights (designed for turn lighting and supporting the dipped beam at lower speeds) and LED corner function. The front fog lights are located in a well-defined space in the lower part of the bumper. Besides their practical function, they also play a design role.

Tail lights

The Fabia features distinctive horizontally designed tail lights, which are available in two versions. The LED tail lights in the basic version uses LEDs for reversing and the fog light, while the top-end option comes with full LED tail lights.

Colour Concept

Using the Colour Concept in black or grey, which offers 23 combinations, you can dress up your car in your favourite colour and give it more personality. The black Colour Concept version allows you to combine a black roof, external side-view mirror caps, and alloy wheels with a different body colour (except Magic Black and Energy Blue). In addition to the grey roof, mirror caps, and wheels, the grey Colour Concept (not available for Graphite Grey and Energy Blue), also comes with the front grille frame in grey.

Interior Design

Ambient lighting

Make your space cosier and more comfortable with interior LED lights. They include ambient lighting running along the dashboard (that can be switched between white and red), and the centre console lighting, door handle lighting, and front and rear reading lights.

SOUND SYSTEM

Getting out is optional

Stepping into the car feels like stepping up in class. The Fabia offers a spacious interior that features high-quality materials and unique possibilities in terms of design, technology and comfort. When inside, you'll never have to step out of your comfort zone.

Virtual Cockpit

With its 10" display, the digital instrument panel (Virtual Cockpit) can offer you on-board computer specifications in combination with other necessary information for your trip, such as navigation. You can choose from five layouts (Classic view shown) controlled via the View button on the multifunction steering wheel.

Digital Display

As a part of the standard equipment, the Fabia is now fitted with the 8" Digital Display which replaces the traditional instrument cluster. It serves all the necessary information in a easy to digest, modern way with a possibility of switching between several modes.

Roominess

The knee and headroom in the rear raises the Fabia to the level of high-class cars.

Decorative elements

The Fabia dashboard, decorated with chrome details, such as the air ventilation and instrument panel cluster frames, combines aesthetics with perfect functionality.

Connectivity

Online Traffic Information

With Online Traffic Information, you always get up-to-date information, saving you time and the stress of sitting in traffic jams. If enabled, the navigation system will automatically recalculate the route to arrive at the destination just in time. With Online Traffic Information, you always get up-to-date information, saving you time and the stress of sitting in traffic jams. If enabled, the navigation system will automatically recalculate the route to arrive at the destination just in time.

Škoda Connect: Take the online world with you

Stay connected wherever you are. Being fully and permanently online means always having access to entertainment, information, and possible assistance while on the move. Škoda Connect is your gateway to a world of unlimited communication options.

Calendar

With the Calendar app, designed for work-related activities, you can spend your travel time productively and safely. The application allows you to conveniently access and interact with your calendar while driving. Using the navigation button, the Calendar app will navigate you to your planned meetings. You can also join conference calls using a connected mobile phone. All of the content is synchronised online and linked to your account for seamless transition between your devices.

Parking position

The vehicle sends its location data to the backend server once the journey is completed. You can then find the position of your parked vehicle using the MyŠKODA app.

CAR

Additional connectivity options

Discover additional options and features. For example, with Laura, a digital voice assistant is available in your car. With the SmartLink feature, supporting Apple CarPlay and Android Auto, the car's infotainment system allows you to use your phone safely while driving. With Car Access, which is part of the MyŠKODA app, our partners will deliver your order directly to your car. You can also enhance the in-car connectivity with additional Web apps such as Weather, News, Digital manual, Traffication, and many more.

Traffication

The Traffication app increases your safety by providing traffic-related warnings from the vicinity of the vehicle. Running in the background, it alerts you if you are attempting to drive the wrong way down a road. Notifications are also shown in the event that hazard lights are activated in the radius of your vehicle.

Laura digital voice assistant

This online-based voice control system understands fluent sentences. Say the destination with natural voice input, dictate text messages, or even ask her to tell you a joke. The online part of Laura is ready for anything. To start fulfilling your wishes, simply contact her by saying "Okay, Laura!"

Simply
Clever

Front compartment

In the centre console compartment, which features two USB-C ports, you will also find a pencil holder and universal clip. It can be used for cables and other small items.

Smart isn't just for phones

USB in the roof panel

Located in the roof panel at the rear-view mirror, this USB-C port is ideal for charging devices mounted on the windscreen.

The Fabia comes equipped with a host of ideas. As the needs of the driver always come first, we came up with solutions that make everyday journeys effortless and the car a joy to drive.

Umbrella compartment

An ingenious compartment with original Škoda umbrella is fitted inside the driver's door. It is designed to let water drain away from the car, keeping the interior dry.

Removable cupholder

For your drinks, a dual cupholder with Easy Open function can be placed on the centre console at the driver's and passenger's fingertips.

Compartment on the centre tunnel

The practical equipment, which will be appreciated by passengers in the rear seats, includes a spacious storage compartment on the centre tunnel together with a flexible cupholder. When not in use, you can fold the cupholder down and increase the storage space.

Comfort And Space

FABIA

Travel comfort class

The best tech tweaks are those that make your life easier without you even noticing them. We followed this motto when we designed the Fabia. Everything from the smallest design details to practical function is conceived to make your journey truly comfortable.

Retractable mirrors

The automatically retractable external side-view mirrors fold in when the car is locked. This protects the mirrors from damage, especially when parking in a confined space, and you also have visual confirmation that you have locked your car. The driver's side mirror also features a dimming function that prevents glare from the car behind you.

KESY

You will quickly get used to the convenience of KESY (the Keyless Entry, Start and exit SYstem), which allows you to lock/unlock your car and start the ignition/switch off the engine without inserting the key.

Heated steering wheel

When the driver feels comfortable, then driving is safer. That's why the equipment range for the Fabia includes a heated steering wheel. The heating function can be controlled via the button on the steering wheel or via the infotainment. Choose a heating level that suits you and enjoy the journey in comfort.

Heated windscreen

With this handy function, you'll never have to scrape the windscreen again. And it's not just winter when it can be used. The windscreen heating, which is controlled via the infotainment, will quickly clear frost or condensation.

Phone box and USB

The phone box, suitable also for large display devices, creates an amplified signal for your mobile phone and, at the same time, wirelessly charges your device while driving. Two USB-C 45W data ports located above the phone box allow you to easily connect and pair your external devices with the infotainment system.

Jumbo box and drink holders

Safely store any small electronic devices in the Jumbo box in the front armrest. You can also find a 12 V socket here. For your drinks, there are cupholders with Easy Open function on the centre console.

Panoramic view

Enjoy the feeling of freedom and more space above your head with the panoramic roof, made entirely of special tinted glass and guaranteeing the highest safety standard as well as thermal climate comfort.

LED reading lights

Thanks to LED technology, rear passengers can use these powerful lamps without disturbing the driver. Besides, the driver can operate the rear lights straight from the driver seat (not shown). Interior LED reading lights front and rear come as part of the LED ambient package.

Vents and USB in the rear

The vents located on the rear side of the front armrest allow rear passengers to easily adjust the airflow to suit them. Here you can also find two USB-C 45W ports enabling mobile phone charging.

Rear armrest

When the middle rear seat is unoccupied, the armrest with drink holders can be folded down.

A home for everything

It's always better to have your things in order. Whether it's at your home or in your car. That can be easily achieved in the Fabia. Thanks to its generous luggage capacity and a host of simply clever details, everything will stay in the right place.

Net programme

The set, including three nets, will reliably prevent your things from moving around. Plus, you will clearly see where you put everything.

Multifunctional pocket

Use the available space in the boot cleverly. A multifunctional pocket designed to stow clothing items and long, lightweight objects will come in handy.

Capacity

The luggage compartment of the Fabia with a basic volume of 380 litres can be extended up to 1,190 litres by folding down the rear seats.

Flexible compartment

The flexible compartment fixed in the side panelling grooves is ideal for carrying flowers, small toys, shopping, etc. You can always adjust the size of the compartment to suit your current needs. When not in use, it can simply be folded away.

FABIA

Safety

Travel assist

The Travel Assist system combines Adaptive Cruise Control (including Front Assist) and Adaptive Lane Assist functions. For maximum safety, the system must be constantly monitored by the driver. That's why a capacitive steering wheel detects the driver's tactility, providing an interactive interface to the system. If the driver is not engaged in driving, this behaviour is detected by the capacitive steering wheel. The Travel Assist system comes exclusively in combination with the Virtual Cockpit.

Adaptive Cruise Control

Using a radar device in the front grille, in addition to its basic cruise control function, Adaptive Cruise Control (not shown) maintains a safe distance from vehicles in front of you. This system operates up to speeds of 210 km/h. Depending on various factors, Predictive Adaptive Cruise Control (shown) is also available. For more information, contact your Škoda partner.

Adaptive Lane Assist

The system is capable of keeping the car in the middle of the correct lane and of alerting the driver in case of deviation. It can also take control of the car in the event of lane changes during roadworks.

Additional experts on board

You can encounter various things on the road. To ensure that the car is ready to handle all situations that may occur en route, additional assistants with multiple functions are on hand to help or fill in for the driver.

Front Assist

The Front Assist system, using a radar device in the front grille, is designed to monitor the distance from the vehicle ahead, including emergency braking function. The system also includes predictive pedestrian protection, which warns the driver via an audio/visual signal as well as a gentle jolt of the brakes.

Side Assist

Using radar sensors in the rear bumper, Side Assist (which can detect other vehicles and harder to see objects like cyclists up to 70 m away) monitors the areas behind and beside your car. Based on the distance and speed of the surrounding vehicles, it decides whether or not it should warn the driver.

Rear Traffic Alert

Using the Side Assist sensors in the rear bumper, Rear Traffic Alert helps you reverse safely from a parking space during poor visibility. It can even engage the brakes automatically if it detects imminent danger.

Park Distance Control

Parking the car is easier and safer with the parking sensors integrated in the front and rear bumper, which check the car's distance from any obstacles.

Park Assist

Minimise the hassle of parking in tight spots with Park Assist. It automatically selects an appropriate parking place and safely parks in a row of parallel or perpendicularly parked vehicles.

FABIA

Not to be missed on any road

The Fabia model always radiates strength and confidence. The Fabia Monte Carlo design with specific black features results in an even more emotional expression and greater dynamics.

Stylish rear

The rear features glossy black elements such as inscriptions on the 5th door (Škoda, model name) and diffuser. The car's dynamic appearance is further accentuated by SunSet tinted windows, which also protect the interior from overheating in sunny weather.

Black front and side

The glossy black features such as the front grille frame, add-on part on the front bumper spoiler, door sill covers, and external side-view mirror caps are always accompanied by black brushed alloy wheels with Aero covers (optional 17" Procyon shown).

Enter an exclusive club

Stepping inside the Fabia Monte Carlo makes you feel exceptional. The interior, decorated with red metallic details and Carbon décor, confidently parades its sporty style without losing any of its practicality. Plenty of attractive equipment for your comfort and safety, including sports steering wheel, instrument panel in Monte Carlo design (optional Virtual Cockpit shown), LED ambient lighting, and advanced assistance systems, also make this car fun to drive.

Comfort and style

The interior features front sports seats with integrated headrests, which provides maximum driving comfort. The specific carbon decor upholstery in black with red and grey stripes is complemented by the black ceiling. The car also comes with front door sill strips with Fabia inscription (not shown).

Pedal covers

The stylish interior is complemented by sports pedal covers in alloy design. The rubber facets on the pedals prevent your shoes from slipping.
