PLUG INTO THE FUTURE

iV – that's the badge we at ŠKODA give our most innovative cars: the hybrids and fully electrified vehicles. But iV doesn't stand for innovative vehicles alone. It also means developing vehicles that are more intelligent, individual and intuitive. Vehicles that are iconic and inspiring. And above all: for everyone. That's what our hybrids and fully electrified vehicles strive for. And that's why we give them the badge iV.

The new ŠKODA SUPERB iV is one of these ingenious vehicles. It offers the combination of a 1.4 TSI engine with an electric drive. ŠKODA's first plug-in further unites this innovative hybrid technology with the iconic design, the inimitable comfort and spaciousness of a SUPERB. All this made impressively accessible – also for families. That's why this SUPERB bears the name SUPERB iV.

Find out more about ŠKODA iV and experience the new SUPERB iV live – and unplugged.

That's Simply Clever. That's ŠKODA.

ENVIRONMENTALLY ELEGANT

PLUG-IN HYBRID TECHNOLOGY

The 1.4 TSI engine offers 115 kW, the electric motor generates 85 kW and the full system power is 160 kW. The battery with a capacity of 13 kWh is located under the floor in front of the rear axle and powers you for an up to 62 km drive (based on WLTP measurements), making this model the ideal choice for driving in the city: cheap, green and quiet (with an exterior sound generator alerting pedestrians that a car is coming). For your maximum driving comfort there is an automatic 6-speed DSG.

CHARGING

The plug situated behind the grille enables the practical charging of the electrical engine. When charging at home and connected to a conventional electrical grid, the battery (if completely empty) will be fully recharged within five hours. The charging time can be shortened to three hours and thirty minutes with a wall box or at a charging station that supports fast charging.

INNOVATIVE FROM THE INSIDE OUT

Everything about the SUPERB iV has been designed to enhance your driving pleasure. Take the SUPERB's top-end solutions, combine them with state-of-art iV technology and you get a car that makes no compromises when it comes to comfort, technology, or safety.

FUNCTIONS

The car also features increased energy recovery functionality during engine braking. It allows effective use of the car's kinetic energy for battery recharging. Thanks to this function, activated via the B symbol located between automatic transmission modes, the electric drive can offer you increased driving range.

CHARGING CABLE COMPARTMENT

No need to think about where to store the charging cables. The charging cable compartment in the boot of the car provides plenty of room for both the fast charging cable and home charging cable.

MODES / DYNAMIC CHASSIS CONTROL

The default Hybrid mode switches automatically between petrol and electric drive, and comes with integrated functions such as Battery Hold (maintain battery charge level) and Battery Charge (charge battery via TSI engine) that can be controlled via the infotainment system. Using buttons on the central console, you can choose E-mode, which delivers

a pure electrical drive, and Sport mode enabling a drive with a full system power of 160 kW. To enjoy the high performance of your car in maximum comfort and safety, the Dynamic Chassis Control (DCC) comes as standard. As part of the infotainment menu, it allows you to select one of three modes according to your specific requirements: Comfort, Normal or Sport.

VIRTUAL COCKPIT

A perfect overview is provided by the Virtual Cockpit, which can display on-board computer specifications in combination with other information (navigation, etc.) and specific iV information, such as the battery state. You can choose from five layouts, controlled via the View button on the multifunctional steering wheel.

AREA VIEW

You will feel much more confident behind the steering wheel with four cameras that sense the space around the entire vehicle. They are located in the front grill, external side-view mirrors and on the handle of the 5th door. The picture is transmitted in real time to the infotainment display so you can react quicker to whatever comes your way.

CHARGED BY INGENUITY

ŠKODA CONNECT: TAKE THE ONLINE WORLD WITH YOU

Stay connected wherever you are. Being online fully and permanently means not only having access to entertainment and information, but also possible assistance while on the move. ŠKODA Connect includes two categories of service – Infotainment Online and Care Connect – making it your gateway to a world of unlimited communication possibilities.

PARKING POSITION

See the exact location of your car from anywhere. ŠKODA Connect shows the address, time and date of parking on your phone.

LOCK & UNLOCK

This feature allows you to comfortably Lock and Unlock your vehicle via ŠKODA Connect App no matter where you are. For example, in case you forgot to lock your car, you can easily do so with your smartphone from anywhere.

WIRELESS APPLE CARPLAY

Connect your device easily to your car's infotainment system and get directions, make calls, send messages or listen to music without touching your phone. Plus, now you can sync your devices wirelessly via Bluetooth. Apple CarPlay comes with the SmartLink+ system.

EMERGENCY CALL

An SOS call is made automatically during an emergency on the road. The system can also be activated manually by pressing the red button on the roof console.

REMOTE AIR CONDITIONING AND DEPARTURE PLANNER

With Remote Air Conditioning, you will be able to cool down the interior during hot summer days so you can comfortably set off for your trip. You can also schedule the car to be airconditioned at a specific time. The departure planner also allows you to check the battery level or set the time of charging.

CHARGING STATIONS

You can easily search for a charging station in your navigation system when needed. Planning your route is more convenient, as you will be able to get the latest information about prices, charger types and parameters concerning electricity.

ONLINE TRAFFIC INFORMATION

Always take the best route: up-to-date information gives you a perfect overview of every trip. It also enables you to react to new developments, such as roadworks, accidents and traffic jams.

INFOTAINMENT APPS

Infotainment apps enhance the in-car connectivity experience. These apps will be available to download in the shop via infotainment. For example, you can get a detailed weather report for your current location or anywhere else with the Weather app. Infotainment apps will be regularly updated and more apps will be added over time.

LOWER EMISSIONS, HIGHER QUALITY

The SUPERB iV can satisfy even the most diverse demands on exterior appearance, interior comfort, technology and connectivity, available in Ambition, Style and Laurin & Klement equipment levels and even in a unique SportLine version.
